

MANAGED IT SECURITY SERVICES

Helping you improve and maintain your cybersecurity readiness

Managing your IT security across each vulnerable technology within your organization is a complex undertaking and can't be left in the hands of just any IT technician. Each of the above technologies must be guarded by specific tools, solutions, and protocols. That's where our team steps into the picture. We partner with businesses across the region, providing the cyber- security management and response needed to help them stay protected and productive.

Did you know?

43%

of all IT security breaches involve small- to mid-size businesses.

61%

of small- and mid-size companies had a cybersecurity incident in the last year.

83%

of organizations in the small- to mid-size category are not financially ready to recover from cyberattacks.

Having the right team on your side

eData can help you protect each part of your IT environment: fortifying against criminal breaches, providing risk mitigation to your organization, and giving you a better chance to avoid costly unplanned downtime.
